

The background of the entire page is a close-up, high-resolution image of the United States flag. The flag is draped and folded, creating deep shadows and bright highlights on the fabric. The stars are white on a blue field, and the stripes are alternating red and white. The overall tone is patriotic and professional.

Experience excellent pipetting with LTS-Style tips from **PR1MA**™

These tips deliver superior accuracy and precision, ensuring reliable and consistent results. We are proud to manufacture our products in the USA and are committed to sustainability.

Our racks and boxes are made from our exclusive post-consumer resin, while the tips and lids are made from 100% virgin polypropylene for optimum clarity and purity.

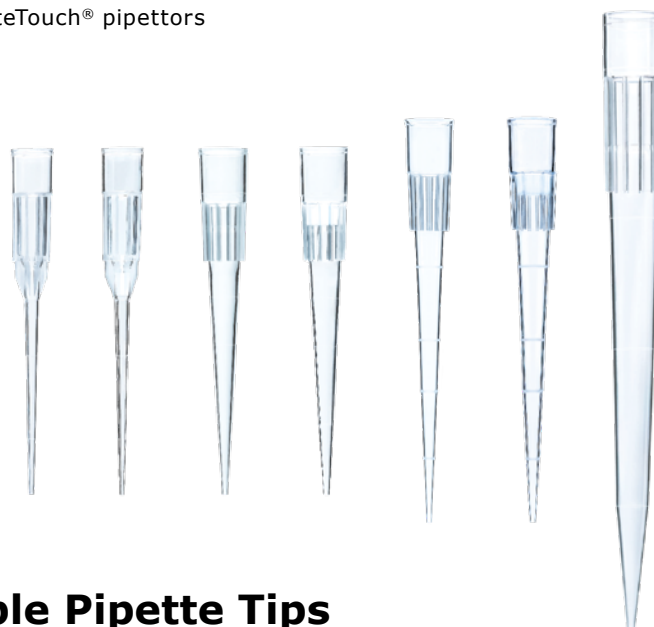

These tips are the perfect fit for use with Rainin® LiteTouch® pipettors and are compatible with both single- and multi-channel LiteTouch® pipettors.

Upgrade your pipetting experience with **PR1MA**™ LTS-Style Tips, which feature ultra-low ejection force for comfortable, ergonomic pipetting.

Rainin, LiteTouch and LTS are registered trademarks of Mettler-Toledo Rainin, LLC.

- Compatible with Rainin® single and multi-channel LiteTouch® pipettors
- Light force required to add or eject tips
- Available in racked, sterile, filtered sterile, and reload varieties
- Tips are made from medical-grade virgin polypropylene
- Rack bases and grids are made from our exclusive 50% post-consumer recycled polypropylene - a reduction of up to 30% in the use of virgin polypropylene per rack of tips
- Proprietary resin technology facilitates clean release

PCR/qPCR REAGENTS

- Superior sensitivity and fast cycling with exceptional results
- Ideal for low copy number templates
- Early Ct values and detection across a broad dynamic range
- Ready to use 2x mastermix
- Includes PR1MA™ Hot Start Taq Polymerase for greater specificity and accuracy
- Inert, blue tracking dye assists with accurate pipetting
- Optimized detection system specific, no change in protocol or results but significantly more cost effective

cDNA Synthesis Kit is a 2-tube format for easy reaction set up and is ideal for 4 pg to 0.5 µg of input RNA. One tube includes our exceptionally stable Reverse Transcriptase combined with a potent RNase inhibitor, and the other tube contains a 5X reaction buffer with an optimal mixture of anchored oligo (dT) primers and random hexamers to produce a nonbiased population of cDNA.

1st Strand cDNA Synthesis Flex Kit includes four components: a high capacity Reverse Transcriptase, an optimized 5X buffer, and separate solutions of oligo (dT) primers, and random hexamer primers. This multi-component format is ideal for 10 pg to 2.0 µg of input RNA and allows for greater flexibility in assay design.
